

Experts in Continuous Monitoring

What are these webinars about?

Our webinars provide a series of bite-size training events which provide detailed insights into the world of ground gas.

Each webinar is designed to be done either as stand-alone or combined with some, or all, of the others to build a broad understanding of the subject. So, take your pick!

How long are the webinars?

Each webinar lasts 1 hour followed by a short Q&A session with our technical experts.

Who are they for?

We designed our webinars to be accessible to a range of viewers, from new graduates through to experienced professionals. Our Q&A section allows you to ask any questions you need answering on ground gas from the basic to the advanced.

Join our experts

Our webinars are led by Simon Talbot, GGS founder and Managing Director, and John Naylor our Technical Director. As respected experts and industry leaders, they are perfectly placed to guide you through the technical content of our webinars.

What do they cost?

For this season's programme we will be offering these webinars completely free of charge.

How do I register?

You will need to sign up for each webinar separately. Click on the relevant webinar title to register.

GGs 2021 training programme
