

Experts in
Continuous Monitoring

Job Title: Geo-Environmental Specialist
Location: GGS Regional Office (Milton Keynes)
Reports To: Regional Manager

What is the role?

We're looking for a Geo-Environmental Specialist with at least two year's work experience to join our vibrant and growing company. The role will involve carrying out specialist gas monitoring and gas management verification services on various active construction and proposed development sites across the south of the UK.

After initial specialist training with our Head Office team in Stockport, you will be assigned to the newly formed Southern Regional Office where you will report to our Regional Manager. With excellent support from the wider GGS technical team, you will provide specialist ground gas related services for new and existing projects. Using a range of hand-held, continuous gas monitoring and verification equipment, the role will involve data collection, analysis, verification and reporting.

The role requires significant independent travel, some work away from home during the week, and a familiarity with site investigation and construction sites; however, your wellbeing is important to us, so you will benefit from flexible working. If you enjoy variety, being outside and having autonomy in your work, this job could be a great fit for you!

About GGS

We are the UK's leading experts in providing continuous ground gas monitoring, analysis and interpretation services. We pride ourselves on providing professional, expert and bespoke services to our clients. GGS' values are integrity, quality and trustworthy, which are key to managing our clients' projects.

At GGS, we are a close-knit company, and you will be working with colleagues from across the business from Technicians to Directors. As a Geo-Environmental Specialist, we will support you in your technical and professional development - drawing on the wide range of expertise across the company. We are an inclusive employer, and we value giving equal opportunities to all.

What we're looking for?

We're looking for an enthusiastic applicant who wants to develop and progress a career in the world of ground gases, across a variety of sectors within our GGS family of experts.

Experts in
Continuous Monitoring
