

## **Geo-Environmental Specialist Job Description**

### **GGs Southern Office**

#### **Role Overview**

GGs is an established market leader in continuous ground-gas monitoring, risk assessment and verification of ground gas protection systems. The company works throughout the UK from its offices in Stockport, Falkirk and Stevenage. As a member of a number of trade bodies, GGS is committed to raising quality standards across the sector.

The continued growth of the company has led to the creation of a number of vacancies including the role of Geo-Environmental Specialist. This role involves variety and provision of a range of monitoring solutions across several diverse sectors. The successful candidate will be part of a rapidly developing company known for its expertise and innovative solutions. This opportunity is specifically suited to geo-environmental specialists with several years site monitoring and sampling experience.

#### **Your role**

The role is equally office and site based (estimated at 50% and 50% respectively) and will involve travelling to client sites across the South of England to carry out a range of monitoring services and installation of monitoring equipment. As some of this work can be physically demanding, a good level of general fitness is required. A key element of the work will be use and operation of specialist continuous ground gas monitoring equipment with an equal proportion of time devoted to data acquisition, processing and reporting.

Specialist training is provided and career progression through to professional chartership is encouraged.

#### **Capabilities and accreditations you bring to the role**

You will be organised, self-motivated and have good time-management skills. You will enjoy driving and working outdoors. Initially you will accompany other colleagues to carry out site work, with increasing amount of independent working based on experience. You will, have good data processing skills and strive for accuracy and best-practice in all that you do. You will have good written and verbal communication skills and be confident to speak to clients.

The successful candidate will have had post-graduate work experience in a geo-environmental role or a second degree in a geo-environmental degree.

#### **What you can expect**

As an important member of GGS's technical team you will be supported by experienced and knowledgeable project managers and technical experts. You can expect to regularly stay away from home and when you do stay away, you will be provided with suitable accommodation, subsistence and an 'away from home' allowance. On commencing your employment with GGS,

you will be provided with a smart phone, laptop and comprehensive support systems including People Safe.

### **GGs Values**

The GGS values are for integrity, quality and technical excellence. The company expects its staff to promote these values in all that they do and exceed client expectations. In return, the company takes the welfare and health and safety of its staff very seriously and looks to continually improve its working practices and procedures.

The company also has been accredited as an Investor in People and is signed up to the Living Wage Foundation.

### **Salary and Benefits**

In addition to a competitive salary and bonus scheme, the company offers, a company vehicle (or vehicle allowance), market leading benefits including private medical insurance, flexible benefits allowance and a minimum of 24 days annual leave in addition to bank holidays.
