

THE A-Z OF GROUND GAS 2024

Developed by PAG and GGS, the 'A-Z of Ground Gas' courses cover best practices in ground gas investigation, monitoring, risk assessment, solutions design, protection and verification. Training material draws on the latest innovative techniques and guidance, as well as case studies, practical demonstrations, and the experience of the course trainers.

Who should attend?

The courses are designed for...

- Consultants
- Architects
- Engineers
- Regulators
- Constructors
- Developers

...who want to understand how ground gas risks can be better managed, protection measures can be better designed, and time and money can be saved.

Choice of two courses

We offer two courses, designed to suit the differing needs of professionals dealing with ground gas. We run two separate days, so anyone wanting to attend both courses can do so.

Course times: 8.30 – 5.00 including breaks, refreshments and lunch (state your diet preferences on the booking form).

Advanced A-Z of Ground Gas

Who is it for?

- Consultants • Regulators • Design Managers

Course structure

1. Introduction and background
2. Lines of evidence & risk assessment
3. Ground Gas & vapour management
4. Validation of Gas protection systems & CQA
5. Summary and Q&A session

Practical A-Z of Ground Gas

Who is it for?

- Constructors • Inspectors • Surveyors

Course structure

1. Introduction and background
2. Detail within the design
3. Installation
4. Verification
5. Practical Session
6. Summary and Q&A session

DATES & BOOKING See page 3 for dates and booking form, or go to pageo.co.uk/training

The A-Z of Ground Gas 2024

Testimonials from previous courses

"Very well structured seminar that covers the essentials about ground gas origin and issues."

"Very engaging speaker, warm welcome, felt confident to ask questions."

"Excellent team, great rapport and energy with each other. Great delivery of course materials. Extremely helpful and knowledgeable. Really enjoyed the course, highly recommend to anyone."

"Very interesting and useful and useful to see real issues and practical info."

"Extremely good and very comprehensive course. Found it to be very useful. Particularly the installation and verification parts."

Course experts

Simon Talbot *Managing Director, Ground-Gas Solutions Ltd*

Simon is an Engineering Geologist and Chartered Engineer with 40 years professional experience working in both the private and public sectors. Most of this work has focused on contaminated land and ground gas issues. Prior to starting GGS in 2009, he spent 11 years working as Director of Greater Manchester Geological Unit where alongside teaching, training and research he collaborated on the development of continuous ground-gas monitoring. Simon has published several technical papers and regularly speaks at national and international conferences.

John Naylor *Technical Director, Ground-Gas Solutions Ltd*

John has over 20 years professional experience working within the contaminated land and landfill arenas for both the public and private sectors. He has worked to improve the contaminated land investigation, assessment, remediation and verification at both practical and regulatory levels. A key developer of continuous ground gas monitoring methodologies, John has helped to establish guidance in ground gas issues, working closely with consultants, local authorities and landowners. As well as developing verification and validation best practice and training. John is a Chartered Environmentalist and is a member of both the EPUK Quality Committee and Vice Chair of The Radon Council.

Peter Atchison *Managing Director, PAGeoTechnical Ltd*

Peter is a geosynthetic specialist with over 40 years' experience in geomembranes and associated products. As a consultant he specialises in contaminated land issues, offering technical and commercial consultancy support as well as materials and Contracting services across the sector. Peter chairs the ISO International Standards committee and represents the UK on CEN European Committee for Standardisation, where he is involved in standards setting and advice to the legislative process. Peter also sits on the board of CCS, EIC and BGA, PCA and The Radon Council.

Neil Salvidge *Training Manager, Training, Development & Assessment*

Having originally trained as a carpenter and joiner, Neil moved to the geomembrane sector in the 1990s and in 2000 he joined PAGeoTechnical Ltd as an Installation Technician and trainer, promoting best practice through training. Neil gained Assessor status with CITB, as the initial assessor for NVQ Level 2 in gas membrane installation. He is involved with developing industry standards and has supported the development of NVQ Level 4 Verification of Ground Gas protection systems. In 2018 Neil established his independent training company and remains passionate on the delivery of quality training.
