

Graduate Geo-Environmental Specialist

About the role

We're looking for a Graduate Geo-Environmental Specialist to join our growing team to help deliver our specialist ground gas monitoring services, including the market leading continuous monitoring service.

The role will involve carrying out specialist environmental monitoring, risk assessment and reporting on a variety of projects across the UK.

You will be working with the wider team to help deliver essential ground gas monitoring services, along with data processing, analysis and report writing.

Your responsibilities will include:

- conduct specialist ground gas monitoring surveys
- accurately recording and processing environmental data
- contribute to data analysis and report writing
- carry out site and field work safely and in line with our Health & Safety policies

The role does require significant travel and field/site work. So, you will need to enjoy being outside, travelling the country and be comfortable working independently in the field.

About us

At GGS, we have been the UK's leading experts in continuous ground gas monitoring, analysis and interpretation services for over a decade.

We are expanding provision of our continuous ground gas services tailored to the needs of our growing client base. This is an exciting opportunity to participate in this rapidly expanding business.

We are an inclusive employer, and we value giving equal opportunities to all.

What we're looking for

We're looking for enthusiastic applicants who are seeking to progress a career in ground gas and contaminated land, whilst proactively contributing to the successful expansion of GGS.

Essential skills, knowledge and experience

- Bachelors degree in a relevant geo/environmental discipline
- Full UK driving licence
- Proactive with a practical aptitude and good problem-solving skills
- High level of computer literacy
- Good verbal and written communication skills
- Ability to work well both independently and within a wider team
- Ability to prioritise and manage workload to meet deadlines

Desirable skills

- Post-graduate degree in a relevant geo/environmental discipline
- Experience of lone working in the field/on-site
- Experience of the ground gas or contaminated land sector
- Membership and involvement with a relevant professional institution
- Experience with specialist software packages (e.g. QGIS)

Specialist training

We provide full specialist technical training to help you develop the ground gas monitoring and assessment skills required for the role. You will work closely with the GGS team in Stockport, from site staff through to our directors.

We have a skills development framework which provides a structured approach to tailor your specialist learning, development and progression through the company.

Location

You will be based in the GGS office in Stockport, with regular site work across the UK.

Working hours

Full-time (40 hours/week).

Salary

£26-27k (depending on experience).

Staff benefits

We take a forward looking approach to taking care of our staff, providing a range of attractive benefits and encouraging a good work-life balance.

Some of these staff benefits include: good pension provision, opt-in for personal private medical insurance, a £1,000 flexible benefit pot, flexible working, over-night stay 'bonus' payments and work from home options (when not required to be on site or in the office).

Apply now

During the recruitment process we are committed to making the process accessible. Please notify us of any reasonable adjustments you may require supporting your application. If you can demonstrate all essential requirements for the role in your application, please also notify us if you would like to be considered a guaranteed interview under the disability confident scheme.

If you are passionate about environmental monitoring and believe you have the skills and experience to excel in this role, we would love to hear from you. Please send your application, including your CV and a cover letter, to info@ggs-uk.com.
